PROFILE

Results-driven Backend Developer experienced in engineering robust APIs and enterprise systems across fintech, education, and institutional sectors. Proficient in Golang, Python, PHP, PostgreSQL, and MongoDB to build secure, scalable solutions. Adept at database management and microservice architecture, focused on developing efficient infrastructure that enhances performance, reliability, and end-user experience.

PROFESSIONAL EXPERIENCE

PT Bank Raya Indonesia

Jakarta, Indonesia

Back-End Developer

Sep 2024 - Present

- Built and maintained scalable backend APIs and microservices using Golang, PostgreSQL, and Redis.
- Contributed to Raya Mobile App core features, including personal service summaries, automated email delivery systems, and flexible Paylater payment options.
- Developed a centralized Operational Dashboard to monitor, analyze, and streamline Paylater transactions and services.

Universitas Logistik dan Bisnis Internasional

Bandung, Indonesia

Back-End Developer

Mar 2023 - Sep 2024

- Created and deployed institutional systems including an Employee Attendance ChatBot, Internal Audit System, and Donation Management System.
- Enhanced existing HR Information Systems and Academic Dashboards using Golang (Fiber) and Python to improve system efficiency and data accessibility.

PROJECT & FREELANCE EXPERIENCE

PT Sarana Legalitas Indonesia

Jakarta, Indonesia

IT Developer (Freelance)

May 2025 - Oct 2025

- Developed "EFidusia", a web application for legal document management using Python Django and PostgreSQL.
- Designed efficient data models and workflows to handle per-document legality processes.
- Set up CI/CD pipelines with Docker for automated testing and managed deployment on Ubuntu servers.

Museum Geologi

Bandung, Indonesia

Back-End Developer (Internship)

Sep 2022 - May 2023

- Developed an Inventory Management System to digitize and manage museum collection data.
- Built high-performance RESTful APIs using Golang (Gin) and MongoDB NoSQL database.

EDUCATION

Universitas Logistik dan Bisnis Internasional

Bandung, Indonesia

Bachelor's degree, Information Technology

Oct 2020 - Sep 2024

Cumulative GPA: 3.67/4.0

SKILL

- Technical skill : Golang, Next.js, PHP, Python, MySQL, PostgreSQL, MongoDB, Docker, Git, Redis
- Soft skill : Problem Solving, Teamwork, Critical Thinking, Time Management
- Language : English (Intermediate)
